

# MOVE FORWARD WITH BMW GROUP REMANUFACTURED PARTS.

NOW AVAILABLE: TURBOCHARGERS, ALTERNATORS,  
TRANSFER CASES, STEERING GEARS AND TRANSMISSIONS.

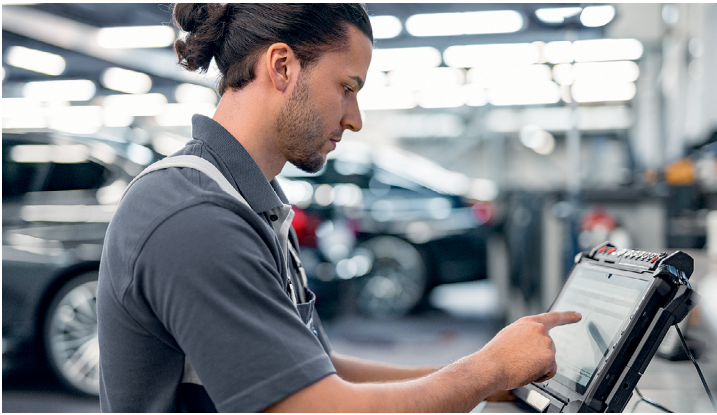

**Better for your customers. Better for you.** Uncompromising quality, at a lower cost. It's a formula that works for your customers, and for you. When you offer BMW Group Remanufactured Parts to your customers, you not only provide the highest quality parts for BMW and MINI vehicles but also all of the benefits including a two-year unlimited mileage limited warranty similar to new parts.

**We are pleased to offer a range of Remanufactured Parts that you can provide to your customers right away, including select turbochargers, alternators, transfer cases and transmissions.**

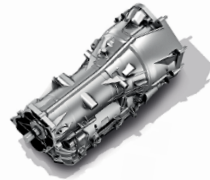

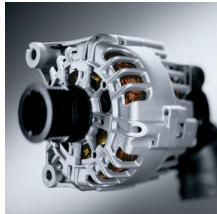

**BMW  
GROUP**

## BENEFITS: FOR YOUR CUSTOMERS.

- Cost savings backed by competitive prices.
- Peace of mind, because every BMW Group Remanufactured Part undergoes the same quality and testing requirements as new parts and comes backed by a two-year unlimited mileage limited warranty.
- The assurance of retained vehicle value and performance.
- The satisfaction of knowing remanufacturing is good for the environment, using less energy and creating less waste.

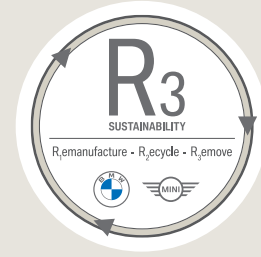

## BENEFITS: FOR YOUR BUSINESS.

- With over 30 years of BMW Group remanufacturing experience, Remanufactured Parts benefit from the latest updates, ensuring you're always providing the highest quality product.
- Increased pricing competitiveness to help build long-term customer loyalty.
- Higher workshop capacity.
- Enhanced cross-selling opportunities.

## INSIST ON BMW GROUP REMANUFACTURED PARTS.

There are a lot of aftermarket parts suppliers that sell products labeled as remanufactured parts. None can offer all of the benefits of BMW Group Remanufactured Parts—but customers are not always informed of the difference. Remanufactured parts fit the exact requirements of their vehicles as they are designed, tested and approved to meet BMW's OE specifications. It's an opportunity to ensure customer satisfaction by retaining the performance and value of their vehicle. **Continue to grow your business with select remanufactured turbochargers, alternators, transfer cases, steering gears and transmissions.**

## HOW IT WORKS: THE BMW GROUP REMANUFACTURED PARTS PROCESS.

The BMW Group Remanufacturing Process starts with high-quality cores that are collected only from our BMW and MINI dealers. The cores collected are often the original part the car was built with.

### PROFESSIONAL DISMANTLING.

Disassembled by a BMW Group-approved remanufacturer.

### CLEANING, VISUAL INSPECTION, COMPONENT TESTING AND REASSEMBLY.

Wear-and-tear components and defective components are replaced or updated to the latest revision.

Non-OE spec components are never used in BMW Remanufactured Parts.

### QUALITY CONTROL.

Every BMW and MINI Remanufactured Part must pass the same quality control procedures as Original BMW and MINI Parts.

### AVAILABLE FOR ORDERING.

Parts can be ordered and purchased through your local dealer network.

**For more information, please contact your local BMW or MINI Parts Department.**
